PROFESSIONAL EXPERIENCE

I am a Frontend Developer with nearly 4 years of experience working at Deloitte, skilled in building dynamic, scalable, and user-friendly web applications using React.js, JavaScript, HTML5, and CSS3. I have successfully contributed to projects involving the development of reusable and responsive UI components, ensuring seamless user experience and performance optimization.

TECHNICAL SKILLS

- Languages : JavaScript, C, Java
- Frontend Technologies : HTML5, CSS3, JavaScript, jQuery, React JS, Bootstrap, Material UI, Redux
- Tools : Adobe Experience Manager (AEM), GitHub, JIRA, Workfront
- Other : Agile

PROFESSIONAL SUMMARY

- Developed and maintained reusable **React.js** Components using hooks, functional components and modern React best practices for ensuring high performance and maintainability.
- Integrated custom React components with **Adobe Experience Manger (AEM)** for dynamic component rendering and personalized user experiences.
- Created responsive and interactive UI designs using Bootstrap & custom CSS based on XD and Figma designs.
- Integrated **RESTful APIs** for handling dynamic data and asynchronous operations.
- Managed state and component life cycle using Redux optimizing rendering and enhancing performance.
- Implemented **React Router** for seamless navigation and enhancing user experience.
- Developed and optimized dynamic and interactive dashboards for real-time health care data visualization.
- Followed **ES6+ JavaScript** standards and implemented best practices for clean and maintainable code.
- Used **GitHub** for version control and code collaboration.
- Provided technical support for troubleshooting issues and implementing performance optimizations.
- Collaborated with designers, backend developers, and quality assurance teams to deliver user-centric, scalable solutions.
- Worked in **Agile/Scrum environments**, collaborating with cross functional teams to deliver rich applications.

WORK EXPERIENCE

Frontend Developer   *February 2023- Present*
Deloitte USI   *Hyderabad, Telangana, India*
Client: Deloitte Global
Description: Deloitte Global provides audit, consulting, financial advisory, risk advisory, tax, and legal services with employees globally, and operates in over 150 countries.

Roles and responsibilities:
- Developed and deployed custom React JS components integrated with adobe experience manager to enhance content authoring experience.
- Created custom HTML fragments and templates to enable dynamic content management and reusable structure and design.
- Built interactive and responsive UI components using Bootstrap and custom CSS for consistent and cross device user experiences.
- Managed complex state and data flows using context API for efficient scalable performance.

- Developed a custom QA application using React.js and Puppeteer for automating testing processes.
- Utilized React Hooks and life cycle methods to optimize component rendering and application performance.
- Handled code versioning and collaboration using GitHub ensuring code quality and development workflows.
- Involved in developing web pages for major campaigns like Davos and COP29.
- Supported the maintenance and enhancing of existing components resolving issues.

AEM Frontend Developer   *October 2021- February 2023*
Cognizant Technology Solutions   *Chennai, Tamilnadu, India*
Client: AstraZeneca
Description: AstraZeneca is a Pharmaceutical and Research Company, for which I am committed to developing websites for their products and launching activities. Handles technical and functional issues in the org through Agile methodology.

AstraZeneca Website Management:
- Developed and visually engaging web pages and applications using HTML, CSS, JavaScript, Bootstrap, and Tailwind CSS to craft responsiveness.
- Developed customized React.js functional components and integrated it with AEM.
- Developed numerous custom HTML and CSS fragments in Adobe Experience Manager, ensuring flexibility and consistency in content development.
- Configured standard components using AEM as per business requirement.
- Ensured SEO best practices and page optimization for better user experience and search rankings.
- Deployment/launching of sites to production using AEM by taking proper pre and post deployment steps.

Healthcare Dashboard:
- Developed React.js dashboard to visualize and manage patient and doctor information in a secure and user-friendly manner.
- Implemented dynamic data tables to display diagnosis reports, patient & doctor details, and dosage information for AstraZeneca medications.
- Consumed and integrated RESTful APIs to fetch patient and doctor records in real-time.
- Integrated search and filter functionalities to easily access specific patient records and dosage reports.
- Collaborated with backend developers, Designers and QA teams to deliver solutions.

CERTIFICATIONS

- HackerRank Certification in React.js | **CERTIFICATE**
- HackerRank Certification in JavaScript | **CERTIFICATE**
- HackerRank Certification in CSS | **CERTIFICATE**

AWARDS & RECOGNITION

- Received the Applause Award at Deloitte for developing a QA automation tool, enhancing process excellence.
- Awarded the Spot Award for delivering multiple custom pages within deadlines.
- Received appreciation from stakeholders for successfully delivering custom pages for major campaigns (Davos, COP29) at Deloitte.

EDUCATION

Bachelor of Technology in Electronics & Communication Engineering   *2017-2021*
Geethanjali Institute of Science & Technology, Nellore | 7.4 CGPA
